

31 July 2019

**Mosman Oil and Gas Limited  
("Mosman" or the "Company")**

**Six Month Production Update**

Mosman Oil and Gas Limited (AIM: MSMN) the oil exploration, development and production company, provides the following production information, highlighting an 81% net increase in attributable production to Mosman for the six months ending 30 June 2019.

**Production Summary**

Gross production for the six months ending 30 June 2019 was 37,811 boe and the Net Production attributable to Mosman was 11,742 boe.

Gross production for the year ending 30 June 2019 was 55,508 boe and the Net Production attributable to Mosman was 18,216 boe.

Compared to the six-month period ended 31 December 2018 Net Production attributable to Mosman increased 81%.

Additionally, Net Production attributable to Mosman for the year ended 30 June 2019 increased 138% from the previous year.

The results reflect both the increase in the number of producing wells and continued increases in production rates at the projects that Mosman has ownership in.

**Production subsequent to six-month reporting period**

Mosman also highlights the increase in Production at the Stanley project in July 2019.

In July 2019, (with Stanley 2 having been recompleted and on production from 4 July), the Stanley project has produced 6,010 boe (Gross) representing a Daily average Gross production of 215 BOEPD. This compares to the Stanley Gross production of 14,153 in the six-months and represents a Daily average Gross production of 79 BOEPD during the six-month period to 30 June 2019 (although this period was impacted by workovers).

Mosman further advises that in the seven days ending 28 July 2019 this average has increased again to over 233 boe.

Further production increases are expected from the drilling of the Stanley-3 well which is due to spud shortly, and the Falcon-1 well which is due to spud in the current quarter.

Production at the other projects appears to be in line with expectations and reported historic production.

**Production (6 months ended 30 June 2019)**

Total Gross Production was 37,811 boe an increase of 106% (18,253, six months to 31 December 2018).

Net Production attributable to Mosman was 11,742 boe an increase of 81% (6,476, six months ended 31 December 2018).

Further details are outlined below:

	<b>6 Months to 30 June 2019</b>	<b>6 Months to 30 June 2019</b>
	Total Project Basis	Net Production Attributable to Mosman
	Gross BOE	Net BOE
Stanley	14,153	2,353
Welch	6,210	4,760
Arkoma	16,945	4,227
Strawn*	503	402
<b>Total BOE</b>	<b>37,811</b>	<b>11,742</b>
	<b>12 Months to 30 June 2019</b>	<b>12 Months to 30 June 2019</b>
	Total Project Basis	Net Production Attributable to Mosman
	Gross BOE	Net BOE
Stanley	20,224	3,355
Welch	11,347	8,697
Arkoma	22,911	5,343
Strawn*	1,026	821
<b>Total BOE</b>	<b>55,508</b>	<b>18,216</b>

\* Strawn project was sold at the end of June 2019

**John W Barr, Chairman, said:** "Mosman continues to grow its production with a significant 81% increase in H2 over the first half which reflects general increases in production and the Stanley wells.

"The further increases at Stanley in July 2019 are particularly pleasing and this, combined with the two further wells which are due to be drilled this quarter using existing cash resources, provides further exciting growth opportunities.

"The horizontal wells at Welch remain subject to funding, where options are being reviewed, including a farmout. Planning continues for other additional wells."
