Falcon-1 Drilling Update

Mosman Oil and Gas Limited (AIM: MSMN) the oil exploration, development, and production company, announces an update on drilling at the Falcon-1 well on the Champion Project in East Texas.

The well has been drilled to Target Depth of circa 7,762 feet. Several Frio sandstones were intersected as expected and this has confirmed the geological model based on 3D seismic and nearby wells.

The next step is to run the wireline logs. Mosman intends to report on the results once these logs have been evaluated.

Based on the results so far, the decision has been made to run casing in the expectation of completing the well as a production well.

Competent Person's Statement

The information contained in this announcement has been reviewed and approved by Andy Carroll, Technical Director for Mosman, who has over 35 years of relevant experience in the oil industry. Mr. Carroll is a member of the Society of Petroleum Engineers.
