

16 January 2023

**Mosman Oil and Gas Limited
("Mosman" or the "Company")**

Cinnabar-1 pipeline completed and regular oil sales

Mosman Oil and Gas Limited (AIM: MSMN) the oil exploration, development, and production company, confirms that the pipeline connecting the recently drilled Cinnabar-1 well to the existing production facility in Texas has been completed. Mosman owns a c.75% working interest in the well and the 350-acre lease. Mosman Operating LLC, a 100% owned subsidiary of Mosman, is the Operator of the lease.

The Cinnabar-1 well has been producing since 29 December 2022 with average oil production of 128 barrels of oil per day (bopd). Regular oil sales have now commenced utilising road tankers. In addition to the oil production, the gas was tested and measured at 180 Mcfd (c. 30 boepd). The gas will be used to gas lift oil from the existing G-1 well and also sold.

John W Barr, Chairman, said: "I am pleased to report solid progress at Cinnabar. The work to increase overall production is progressing well and in the near term there is also potential upside from workovers of the two older production wells, which is why gas lifting at G-1 has been prioritised.

"We have already commissioned an update to the Reserve Report, which is an important step in understanding and communicating the size and value of Cinnabar, and in planning the full development of the lease. The updated report is expected to be completed in the next thirty days."

Mosman has a portfolio of development and exploration projects, with a clear focus on maximising the opportunity for further production growth and increasing cashflow. In addition to its US projects, Mosman has two exploration areas in Australia which are well positioned to take advantage of the increasing demand for Helium and Hydrogen, in addition to Oil and Gas.

Qualified Person's Statement

The information contained in this announcement has been reviewed and approved by Andy Carroll, Technical Director for Mosman, who has over 35 years of relevant experience in the oil industry. Mr. Carroll is a member of the Society of Petroleum Engineers.
